Clyde Pump range of API 610 10th Edition (ISO 13709) BB2 pumps are available for hydrocarbon processing, power and specialty applications. The API 610 10th edition stringent noise and vibration limits are met due to the rigid pump body, 360 degrees bearing support and heavy centreline mounting. Reliable operation at elevated temperatures is ensured due to a number of cooling devices complementing inherently cool running finned bearing modules.
