Visual Guide to Your Nervous System - WebMD

The nervous system is designed to help humans perceive the world around them and to keep them safe. A simple example of the human nervous system is when your finger or hand gets too close to a heat source and you instinctively pull back. Your brain and nerve endings feel the heat and signal your muscles to retract your hand.

Nervous System Lessons, Worksheets and Activities

Nervous System As it transmits messages between your brain and body, your nervous system controls an amazing amount of the things you do, like walking, talking, thinking, reading, writing, and breathing. The activities in this Teacher's Guide will help students make their own connections with how the brain and the nervous system work.

Grades 9 to 12 • Nervous System - KidsHealth

Nervous system practice test. First things first: you're going to need to get in some practice. After some initial reading around the subject (we recommend our article on The Nervous System), one of our favorite ways to get acquainted with a new anatomical topic is with a labeling exercise. Think of it as a sort of nervous system practice test run.

Nervous system anatomy practice: Quizzes and more! | Kenhub

The basic unit of structure and function in the nervous system is the neuron, or nerve cell. Neurons (NYUronz) conduct impulses through- out the nervous system. As shown in Figure 36.1, a neuron is a long cell that consists of three regions: a cell body, dendrites, and an axon.
