The malloc() function allocates size bytes and returns a pointer to the allocated memory. The memory is not initialized. If size is 0, then malloc() returns either NULL, or a unique pointer value that can later be successfully passed to free(). The free() function frees the memory space pointed to by ptr, which must have been returned by a previous call to malloc(), calloc() or realloc().

free(3): allocate/free dynamic memory - Linux man page

Once completed your TAO installation should be updated to a transitional version halfway between TAO 3.2 and TAO 3.3. Continue the upgrade To proceed with the second part of the upgrade, you will need to overwrite the composer files located at the TAO root with the composer files in the temporary folder /TAO_3.3.0_sprint-96-97_final:

Moodle

A user guide, also commonly called a technical communication document or manual, is intended to give assistance to people using a particular system. It is usually written by a technical writer, although user guides are written by programmers, product or project managers, or other technical staff, particularly in smaller companies.. User guides are most commonly associated with electronic goods ...
