14. Stop the engine, remove the jumper wire from the ignition timing adjustment connector (brown), and return the connector to its original condition. 15. Start the engine and check that ignition timing at the standard value. Standard value: Approx. 10 BTDC NOTE 1. Ignition timing is variable within about ± 7 , even under normal operating. 2.

Workshop Manual L200

We found this out AFTER our timing chain went out. When we took it to the mechanic and he told us it was a timing chain failure. He looked in the engine to see how much damage was caused and determined that we needed a new engine. You may have gotten lucky and only had minor damage and maybe they can re-build it, but that can also be costly.
