This is a real issue for any voyager. Research on the resale value of older boats that offered both saildrive and conventional prop shaft-drive setups showed a definite preference toward the shaft-drive configuration. Boats from Canadian builder Hinterhoeller used both saildrives and conventional shaft drives back in the

With the saildrive, the weight of a shaft, stuffing box, and propeller are moved forward, almost under the engine. Further, the propeller's angle of attack is more parallel to the surface of the water, which will enhance efficiency and help to minimize traditional prop-walk characteristics common to conventional drive configurations.
