Use Randomized Questions Most questions in WebAssign include randomizations that show different values to each student and consequently each question will have a different numerical solution. If a problem does not include any randomizations, it is denoted as a comment under the question while adding it within the Question Browser.

### Promoting Academic Honesty Using WebAssign

Many questions in WebAssign include randomizations that show the same question with different values to each student. Although each student will receive a similar question, they'll be working with different values and will not be able to share answers. You can enable question randomization within the assignment settings.
