Yamaha Outboard Engine Problems

Consumers who experienced problems with certain outboard motors manufactured by Yamaha may have legal recourse to collect compensation for the cost of repairs and other damages. It has been alleged that the company's first-generation F-Series four-stroke outboard motors (model years 2000 - 2005) contain a serious defect that allows the exhaust passages to corrode and pit severely, ultimately resulting in premature engine problems and failure.

Oil injection on all outboards produces an intermittent beep when there is either a problem with your motor not getting oil, oil tank level sensor is bad, or your oil level in the tank is low. When the oil tank is low, you have roughly 30 to 45 minutes running time before being empty.

Outboard boat motor troubleshooting and testing procedures

Troubleshooting Outboard Fuel Pump Problems When people talk about the fuel pump on an outboard, they're referring to the low pressure fuel pump mounted on the side of the motor. The fuel pump has one job, and that's to pump fuel from the fuel tank to the motor. If the fuel pump isn't working properly, the engine won't either.
